GABRIEL MORALES

Software Developer

WORK EXPERIENCE

Software Engineer

Bluepine Group | Jan 2021 - Jun 2022

- Developed diverse decentralized Automated Market Makers (AMM). Assisted and helped with deployments and smart contracts integrations.
- Built UI-Kit packages on React, containing reusable components and themes for various interfaces and applications
- Designed Decentralized Apps UI and UX focused on technical feasibility and project functionality.

Frontend Engineer

Scrolller.com | Dec 2021 - Feb 2022

- Implemented incognito, traffic and share trackers to collect data for analytics.
- Updated and improved components, created multiples features for the app and fixed logical issues .

Frontend Developer

Pixel Perfect (PXLP) | Jul 2021 - Dec 2021

- Reformed E-Commerce websites into SSR, Single Page Applications using NextJS and Gatsby JS.
- Created components, modules and interfaces with React, TypeScript and TailwindCSS to automate page building.
- Fetched data from CMS using GraphQL for easier customization and rendering on modules.

EDUCATION

Platzi

Educational Platform | November 2020 - Current

U.E Colegio José Félix Ribas, San Cristóbal, Venezuela

Hlgh School in Science | Graduated in 2018

INTERESTS

Communication and creativity are two of my passions. Particularly, I am interested in exploring new visual solutions through graphic design. On the other hand, I've been learning about blockchain and the broad amount of problems that could be solved with it. I'm an enthusiast of this technology
